

Vocabulary Unit 5

Discovery and invention

- 1 Find and circle eight words in the wordsnake.
Complete the table with the words.

| VERBS | NOUNS |
|------------------|---------------|
| <u>adapt</u> to | adaptation to |
| (become) extinct | (1) _____ |
| (2) _____ | creation |
| cure | cure |
| design | design |
| develop | (3) _____ |
| discover | (4) _____ |
| experiment | experiment |
| explore | (5) _____ |
| (6) _____ | imagination |
| invent | (7) _____ |
| test | test |

- 2 Are the sentences true (T) or false (F)?

A **cure** is something that makes someone who is ill better again. T

- Animals like dinosaurs and dodo birds **became extinct** many years ago, but there are still a lot of them on Earth.
- When you first move to a new place you might need some time to **adapt** to your new life.
- When you find a place that people have never seen before, you have made a **discovery**.
- Explorers like Christopher Columbus and Amerigo Vespucci did lots of **tests and experiments**.
- People who always have good ideas usually haven't got very good **imaginations**.
- Sometimes after you create something for the first time, you **develop** it to make it better.
- People like Alexander Graham Bell, the man who made the telephone, like to **invent** things.

Life and the universe

- 3 Label the photos with the words in the box.

~~alien~~ astronaut Earth space star sun

alien

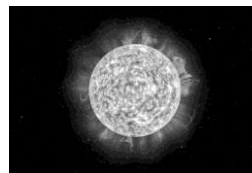

1 _____

2 _____

3 _____

4 _____

5 _____

- 4 Choose the correct words.

Ana Hi, Joel. What did you do last night?

Joel I streamed a really good film about a fight between little green **aliens** / **threats** and us, the (1) **gravity** / **humans**.

Ana I think I've seen that film! Did the little green men come from a (2) **death** / **planet** called Darkus?

Joel Yes, that's right. And if you remember, in the film, Darkus is on the very edge of our (3) **universe** / **stars**, but the green men from Darkus travel through (4) **diseases** / **space** to get to Earth.

Ana Yes, I remember. In the end, didn't the green men make the planet really cold because they wanted lots of (5) **life** / **species** of animals to become extinct?

Joel Well, they tried to do that, but the scientists found a way to stop them.

Ana Oh, yes! I remember now!
